Yeah links should be up in about an hour
so should be usenet by this evening and then there will be hundreds of release groups re upping it saying it's there leak lol

matthewy2
Hope so I been F5ing usenet and scene sites last couple of days, hyped for this game!
same here, we had the rss feeds going.
Im waiting for us to.

14.05.2010 18:19

ap0c
I will actually play the copy of this and if its good ill buy it for the ps3.
same with usc

14.05.2010 18:39

Got this on pre-order, will still get it off the groups for a preview tho

Appearing on newsgroups now as "s4vrd" (1)

snoz * 14.05.2010 20:21 #
The MU links been up a while on that site, and seems someone is uploading it now to a.b.g.xbox360
Search for Red_Dead_Redemption_USA_XB360ISO They are 1gb rar's btw, same way that guy @ xb360iso uploaded them to MU as. Once I got I will confirm if it works or not.
Edit
All 1gb-ish rars are up now.
ie : [a.b.g.xbox360@EFNet]-{ Red.Dead.Redemption.READINFO.RF.XBOX360 }-{S7} - "s4vrd.part5.rar" yEnc

OK if you're impatient go ahead and get this.
This is the original 7 links thanks to s4vrdman at xbox360iso
who spent 14 hours uploading to MU so thanks a lot to him for that.
The password to extract is: xbox360iso.com
Pars will not be posted until later. So 1 part missing on a shitty
provider = download 1gb again.
Or wait an hour and I will repack into 100mb rars with pars which and
no password is which a lot easier but you will have to wait an hour
roughly.
I will still post pars for this but not until the other one is done.
this is REGION FREE.
ssv2 = retail copy

oh god I am enjoying this game - really nice graphics - open world - I can't stop doing fist full of dollars type noises when I am playing.

matthewy2 * 15.05.2010 01:33 #
just read playing this game has already caused bans, so if u don't want to get banned stay away

Does this require 9199? (1)

Edit : No it doesn't... (1)

dannyboy * 15.05.2010 12:14 #
Had a quick go last night and loved it, definite buy for me next week! The atmosphere is spot on and everything just feels right, although the horses took a bit of getting used to. Very GTA like though with the letters and icons on the map etc. Looking forward to multiplayer next week (1)

The only time I have died on this is where I was taking cover against a wall and it flung me about 200ft in the air and cratered me like the name had it seems funny as fuck. I hope its not a repeat (1)

I have fixed over 50 360's by using my tutorial, which involves a heatgun.

Know your stuff before you post false information!

I agree a heat gun is the best way to fix a 360 for somone who can't afford a BGA reflow station.

Freezing and colorful blocks means the gpu probably has cold solder joints. The main reason it worked when you tightened the heat sinks really hard is because there was probably a broken solder joint and the tightening simply bridged the connection.

I run my heat gun at 750 degrees for 3 minutes to get full liquidity and have a 98.9% success rate the other 1.1 percent are usually the 0022 errors.

the oven fix is a bad idea unless you have the timing right or else you'll blow caps and the your really screwed.

yes you can burn the solder but you can't burn it off lol cold solder is caused by tons of heating and cooling, at which point solder loses its metallic bonding properties which makes it no longer adhere to the copper pads on the gpu and cpu especially with lead free solder.

but the best method of re-flowing by far is infrared heating but not a lot of people can afford the 3000 dollar price tag for the proper unit

Re: Red Dead Redemption Coming Early?

it takes about 20 minutes to rip a retail copy.
it takes a couple hours to pack it in rar format.usually around 4 to 5 hours
then depending on a persons upload speed it takes about 12 to 15 hours to upload * ruffly an hour to 2 hours per file if you do 7 files

I had a guy that said he has it he lives in florence ky so if hes willing to let me borrow it ill rip it and upload it for everybody. but he hasent txt me back since yesterday so i doubt he was telling the truth and he said hes a member on here so if hes reading this pm me. "IF YOUR TELLING THE TRUTH"

plus i still have 1 more *&^%#@!\$ manager that got his box modded by me and im waiting to hear back from him. Hes hooked me up in the past with early releases to rip so i hope he'll do it again.

The meijers in florence kentucky on houston rd got 10 copies in last night so if any of you know some one that works there pm me so i can "BORROW" a copy and rip it. I cant try because the same security prick kicked me out this morning he got me before i even got to the electronics counter lol.

Re: red dead console ban?

i got 86ed because they said i keep trying to get games early which is a 50,000 dollar fine and they know that half their employees arent game savvy and don't know release dates. I didnt get arrested and i didnt have to fill out any 86 forms so ima try again after 5pm. Ive still got 2 chances cause i know 2 gamestop managers that are modding buddies of mine im just waiting to hear back from them to see if they have balls enough to grab a copy to let me borrow for an hour so i can rip it and give it back. They wouldnt do it with alan wake so i doubt theyll do it with rdr but ive got my fingers crossed

Re: Modding Fail

No offense but why don't you try modding more than just one drive before you start trying to pass yourself off as a modder and charge people for it. I don't know if i speak for just myself but we all learned from reading tutorials , youtube and just plain trial and error.

Just a word of advice"You might want to put 400\$ bucks in the bank to buy your first customer a new xbox"

All the tutorials are self explanatory, step for step and have pretty little pictures. Its one thing to ask for help its another for us to give you all the answers and the easy way out so you can make a quick buck.

Secondly next time you ask you might want to leave the whole i got customers lined up bit out "Because you'll be lucky to get help with that comment"

3rd if you can't understand the information that's out there then you don't need to mod it's as simple as that!!!!!!!!!!!!!! 😊

Re: Need to Make more money...

if you live in an apartment complex put up flyers in each buildings front door and sell dvds for 5 bucks a pop. I personally make around 2900\$ every time a new movie comes out. My biggest sellers are full box sets of the entire Disney, Pixar and dreamworks collections. I think I've made about 5 grand in the last 2 weeks because of christmas. I buy my dvd's by the case i pay about 150 bucks for a case of 1500 {Caution!!!! this is however a little unethical... ☺} believe it or not half the city's police are some of my best customers and ive been doing this since vhs tapes.

Re: Need to Make more money...

yeah lol i think ill start doing that with friends and crap but posting and advertising that is a little dangerous at least until you have a good base of customers. I was notified by microsoft investigators to stop on craigslist with mods and games lol. I could keep this low key

Re: Court ruling forces Mininova to end illegal torrents

We'll do what we always do we'll "ADAPT" as long as the internet is alive there will always be brilliant people out there looking for loop holes and exploits. The internet isn't just a place to share files its a connection to the outside world and a connection to share minds . It costs them millions of dollars in man power alone, they have to stay within the legal perimeters of what the government and our civil rights allow. We however have no jurisdiction or rules we create our own. We have guidelines but no true rules and as long as a personal computer is affordable and internet accessible we will always win. For we are many we have an unlimited cheap resource at our fingertips and all the knowledge we could ever need at the click of a mouse. Let them put up road blocks and scare us I say bring it on because they'll never be able to stop all of us

Re: People who have spent lots of money on DLC etc, not getting banned as much ?

Ive got all and yes i mean all the arcades i buy 5 yrs worth of live each time when 360 came out i had 2 years worth of gold membership that transferred over. Plus tons of add ons so i dont know its highly possible i haven't been hit by the ban hammer "YET" But then again i have 13 consoles registered on the xbox site although my modded console is not registered

tell me something, how old is the console which people have had bans on?
maybe something to do with the new hardware itself and not the drive fw etc.

Re: [<>Graphics Shop<>][SCARYFACE - LOGIE - WEREZ - BASH]

I Need an awsome Banner for my respect is everything 360 clan forums can some one please help. It needs to have a shield and skull in the middle with two crossed guns and a skull and the rest i dont really care about just as long as it looks friggin bad *** the color scheme we use is red and black. Im willing to compensate the sweeter it looks the more ill pay and yes with real money!!!! Plus if it could be an animated banner that would be even sweeter... our main games are cod4, cod5, chrome hounds, phantasy star, cod5 zombies, basically any first person shooter

Also i'm looking to get an animated mural our clan leader and creator passed away a couple months ago and we as a clan really want to commemorate his memory. Our idea for the mural was to have a ghost image of him on the ww2 memorial wall with his name etched in it and a large group of at the bottom solders holdin flickering candles in the air

P.s. Our moto is "Respect!!!! You Give It !!! You Get It !!!"
PM me with a price and a sample

Re: For people have have started thier own Modding Services

Most of my friends are either too broke to even let me mod thiers, or they are afraid. I was going to try some fliers that only speak of getting games for 15 or 20 bucks instead of 50 or 60, then the people interested that called i would tell them what i needed to do. yeah, i was going to do that at a college, but i just wasn't sure, Thought i would ask you guys first.

Re: Homemade Lite-on keygrabber "with pictures"

For me its all about my wallet I wanted my drive flashed and didn't have the money or the patience to buy one off the internet, and all the schematics out there are a little confusing so i figured I'd put a design out that everybody could understand easily

No connectivity kit required, do you know how to put it in vendor mode. When you turn it on eject the tray unplug the power to the dvd rom drive. Do not turn off or unplug the xbox just unplug the drive itself. Push the drive tray back in and plug it back in your xbox lite will blink if you did it correctly run jungleflasher dvdkey place the tip of the logic probe in the hole above the R707 resistor. then click get key and there you have it you have your new key. Run firmware tool 32 and load your dummy file iextreme 1.51 will load automatically as long as you have the new jungle flasher installed. Then run MTK flash 32 and hit lite-on erase it will erase your original firmware after that it will try to run the device intro, it will fail. Click device intro then hit yes Then hit ok. Quickly unplug the drive and plug it back in and viola you have yourself a newly modded Lite-on drive

this is my own personal version of the Lite-on key grabber it cost around \$12 to make and its super simple. I don't use the connectivity kit, when the device Id fails the first automatic attempt I click the button for device ID again Unplug the drive and plug it back in. I hope this helps some of you Lite-on owners plus it saves you about \$70 buying the probe and the connectivity kit.

Re: Laser Trouble

I've had the same problem in the past i tell them its nothing that i did and they are more than welcome to buy a new drive and i would install it and reflash it for free. On top of that if it was an older system the drive could've already been wearing down and the flash just finished it off. take it apart and look at it and see if it is the drive or maybe he's just trying to get one over on you just because he did it for his kid doesn't mean he's not dishonest. I tell everybody that when they leave and their xbox is working 100% what ever happens to it outside of my home that it's on them, but as a business man you have to decide for yourself what to do i can only offer my opinion. That's why when ever i flash or fix somebody's xbox i triple quadruple and tendiple check it then i run a laser buffer and check it again and as long as all is well i send them on their merry way. Have them try using a store bought game and see if it works if not tell them to buy a new laser and replace it. i keep a steady supply of parts on hand just in case. If you still think it's your fault think of it this way when you take your car to get it fixed and it's done and you take it home, then a couple hours later something else goes wrong the mechanics still charge you to get the new problem fixed and i pay for my parts by offering warranties for an extra 50 bucks ill warranty their drive for 3 months if anything goes wrong in that 3 months ill replace it and if not i make an extra 50 bucks.

but that's just my opinion...

Re: Known Locations to get games early!

I worked for Hollywood Video for 3 years and we always got games 3 weeks before their release date because Hollywood Videos have direct accounts with game sellers. I had HALO3 ,CRACKDOWN , COD4 almost 2 months before their release the better the game the sooner we got them in.

The screenshot shows a MySpace profile page for a user named 'anthony'. The profile picture is a black and white photo of a man with long hair and a beard. The bio reads: 'Im the shit', 'Male', '29 years old', 'FLORENCE, Kentucky', 'United States'. Mood: stressed. Below the profile are buttons for 'message me', 'add me', 'instant message', 'forward me', 'add to faves', and 'block me'. To the right is a 'WELCOME' banner for 'Myspace Brand.com'. The banner includes a link to 'Anthony's Latest Blog Entry' and 'View All Blog Entries'. Below the banner is a section titled 'anthony's Blurbz' with an 'About me:' section containing a paragraph about the user's life and experiences. At the bottom of the profile page, it says 'Get More MySpace Layouts like mine at MyspaceBrand.com'. The browser interface at the top shows the URL 'myspace.com/silvermane' and the search term 'silvermane florence, ky'. The bottom of the screen shows the Windows taskbar with icons for Start, Internet Explorer, and other applications.

Yeah, there was a simple glitch for unlimited time online. I abused the hell out of it before it was patched. We even found a way through the barriers around the island, but unfortunately, you die instantly.
